PROFESSIONAL SUMMARY

B.Tech (CSBS) student focused on Java, full-stack and frontend development, with hands-on project experience in responsive web applications, REST APIs, databases and cybersecurity-oriented solutions. Familiar with software development workflows, Git/GitHub and collaborative tools; currently strengthening Java development and modern web development skills.

TECHNICAL SKILLS

Programming: Java, JavaScript, C, C++

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Web Design

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MongoDB Atlas, SQL

Core: OOP, DSA fundamentals, DBMS, SDLC, Problem Solving

Tools: Git, GitHub, VS Code, Postman, Jira, Scrum

Learning: Java Development, Full Stack Development, Cyber Security

EXPERIENCE

Full Stack Developer Intern | Unified Mentor | *Joined: 1 September | 3-month internship*

• Contributing to full-stack development tasks and gaining practical experience with web application development, frontend/backend integration and development workflows.

Full Stack Developer Intern | Cybrom Institute | *2 months*

• Completed two months of full-stack development internship/training, strengthening practical skills in web development and application building.

PROJECTS

ScholarMate – AI-Powered Scholarship Management & Renewal Platform | *Full Stack Development*

• Developed a full-stack platform concept to help students discover suitable scholarships through eligibility-based recommendations, manage applications, track renewal deadlines and receive timely notifications.

• Tech Stack: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs, Git/GitHub.

Smart Job Portal Enhancement System (In Progress) | Full Stack / MERN

• Enhancing a job portal with an Application Reality Score, Fake Job Detector and gamified skill assessments to improve application quality, engagement and platform reliability.

• Working with React.js, Node.js, Express.js, MongoDB, REST APIs and GitHub.

CyberShield SOC – College Lab Security Monitoring System | Cybersecurity / Full Stack Concept

• Designed a centralized SOC concept to monitor college-lab computers, identify restricted website/application usage and flag suspicious activity from a single admin dashboard.

• Planned real-time alerts and automated blocking responses for detected malicious or policy-violating activity, with centralized event visibility for administrators.

RGPV College Website | HTML5, CSS3, JavaScript

• Built a responsive university website interface with navigation, hero, about, information/cards, contact, newsletter and footer sections.

• Used semantic HTML, CSS layouts and JavaScript interactions with a focus on responsive design and clear user navigation.

AI Interview Preparation Platform | React.js, Node.js, Express.js, MongoDB

• Built a full-stack interview-preparation platform with aptitude modules, progress tracking, a responsive dashboard and structured backend APIs.

• Used JWT authentication and Tailwind CSS as part of the application stack.

Scam & Fake Job Detection Platform | React.js, Node.js, Express.js, MongoDB

- Developed a cybersecurity-focused platform concept for identifying suspicious job listings and supporting phishing/scam awareness through reporting and dashboard features.

EDUCATION

B.Tech – Computer Science & Business Systems | School of Information Technology (SOIT), Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal | 2027

Class XII: 65% | Gurukul Academy Co-Ed School

Class X: 67% | Gurukul Academy Co-Ed School

TRAINING & LEARNING

- Offline development training at Cybrom; currently strengthening Java and full-stack development through hands-on practice and projects.
- Practical exposure to Git/GitHub, REST API workflows, Postman, Jira/Scrum and modern web-development tools.
- Continuously learning Cyber Security fundamentals.

ADDITIONAL STRENGTHS

Problem Solving • Team Collaboration • Communication • Adaptability • Quick Learning
